## Since 2015

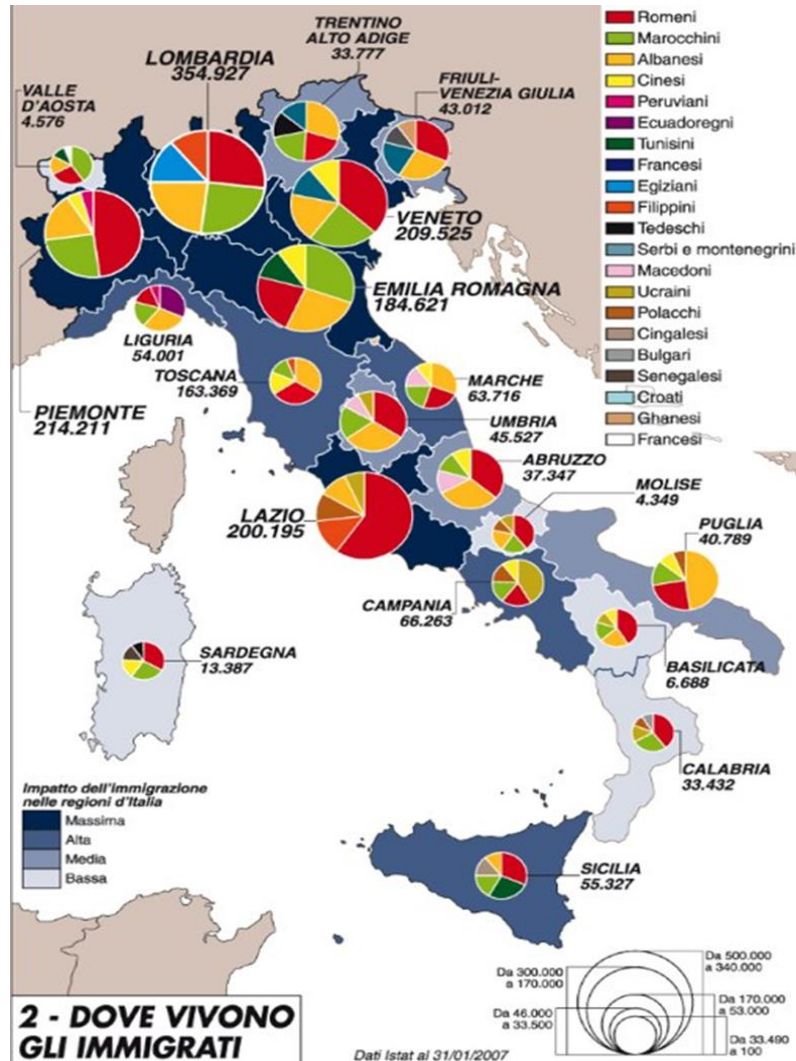

- At the beginning of the 2015, there were 5,014,437 foreign National residents in Italy. Among them there were children born in Italy, but there weren't foreign nationals who have subsequently acquired Italian Nationality; this was applied to 129,887 people in 2014. They also exclude illegal immigrants whose numbers are difficult to determine.
- Since expansion of the European Union, the most recent wave of migration has been from surrounding States, particularly Eastern Europe, and increasingly from Asia, and from North Africa as the major immigration place.

# Immigration Problems

Today more than 4 million of foreign people live in Italy, and around half million of them are illegal immigrants . Much of the migration flows to Italy rose from the ground, especially from Eastern European countries like Romania (the country from which the most absolute migrants arrive in Italy) and Ukraine, or of Asia such as China. As for arrivals by sea in the Channel of Sicily, countries such as Egypt, Tunisia and Morocco are the mostly interested.

The following map also indicates the migrants' entry points, of which eight are located in Northern Italy. However, the number of foreign people that accept working in our country is decided each year by the President of Minister's Council. Many of these people do jobs that Italian workers don't want to do at all for example vegetable pickers, dockers, dishwasher and so on...They live regularly in our country and so they must have the same rights as us.

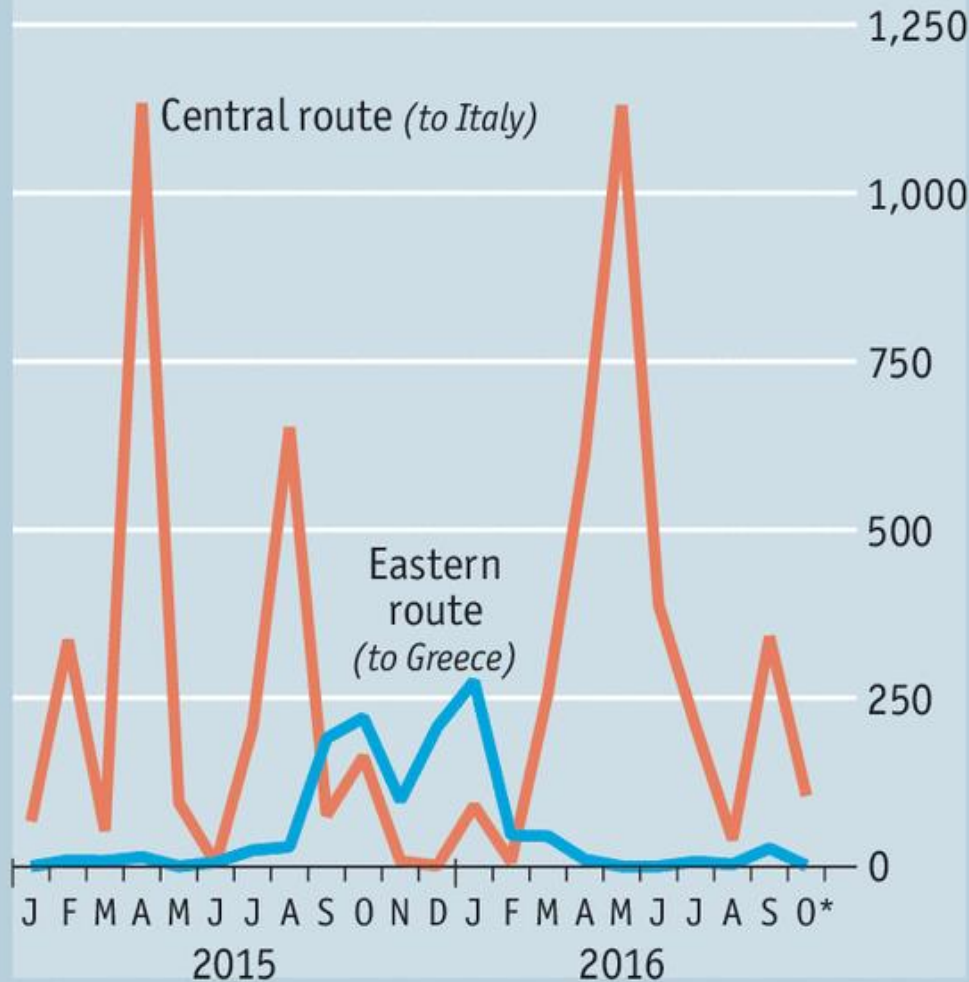

# Where the immigrants live

## Trafficking in misery

Number of migrants dead or missing

Crossing the Mediterranean Sea

Sources: UNHCR; IOM Missing Migrants Project

THIS IS A REAL PROBLEM TODAY. THE GOVERNMENT HAS TO SOLVE IT .....AND EUROPE CAN'T IGNORE IT BECAUSE IT'S THE PROBLEM FOR EVERYBODY WHO WANTS TO LIVE IN A PEACEFUL WORLD.

## Foreign citizens in Italy

| Years | Population                |
